

## Team Scrambled Eggs Members:

- Noah Gardner - [noahgardner303@gmail.com](mailto:noahgardner303@gmail.com)
- Celebi Law - [celebilaw@gmail.com](mailto:celebilaw@gmail.com)
- Matthew Workman - [wathmew@gmail.com](mailto:wathmew@gmail.com)
- Joel Hernandez - [hernandezfjoel890@gmail.com](mailto:hernandezfjoel890@gmail.com)
- Marisa Duran - [mgduran@g.ucla.edu](mailto:mgduran@g.ucla.edu)
- Discussion 1D - Dennis van Ee

## Week 4

- Complete Project Proposal and Schedule
- Gain a basic understanding of React and other necessary technologies by doing Assignment 3
- Create a Github Repository and add everyone in the group into it

## Week 5

- Create framework (start coding!)
- Have a basic design of the website ready (CSS)
- Create different web pages, with buttons to navigate in between them
- Begin implementing account system (backend data & server)

## Week 6

- **Milestone #1: Finish a basic database and user account system**
- Allow users to post
- Allow users to interact with website (i.e. users can write their own reviews, and comment on others' posts)

## Week 7

- Add ability to like and comment on others' posts, and add star ratings and images on top of text to your own
- Add search functionality to sort/filter through results

## Week 8

- **Milestone #2: Implement search/filter functionality. Minimum Viable Product (MVP) available to test and use.**

- Re-evaluate our progress, make any necessary adjustments to features, implementation, etc.

#### Week 9

- Add finishing touches
- Fix bugs (test cases on website)

#### Week 10

- Finish group and individual report
- Practice presentation
- Project source code finished
